

CASE STUDY : Rushmoor Council Car Parks

BACKGROUND

Rushmoor Borough Council own and manage a vast amount of car parks in Aldershot, Farnborough and North Camp in the South of England. We are proud to have them as a loyal client of ours and wish to share with you an overview of the work we have completed for them.

THE CHALLENGES

Rushmoor Borough Council approached us with the future vision of an effective, modernised, integrated communications system which was intertwined and connected to other parking offices across Rushmoor. Rushmoor Borough Council also required a wide area coverage and a more efficient and controlled two-way radio system.

SOLUTION PROVIDED

The digital radio systems upgraded their parking office's current system. We connected the radios and sites together via IP links, so that staff can communicate with other across different locations. We installed a distributed antenna system to boost coverage and installed GPS tracking software on the radios so that staff can be managed more efficiently.

SOLUTION BENEFITS

- Coverage is improved greatly with the use of digital two-way radios and repeaters
- Upgraded, future proof digital radios that have more capabilities and enhance channel spectrum efficiently
- All sites can now connect and communicate with each other which increases operational efficiency and security
- GPS tracking allows greater efficiency whilst managing staff and operations.
